CLEAN WATER/CLEAN AIR BOND ACT 2000-01 Annual Report — Volume 2

Overview of Financial Information

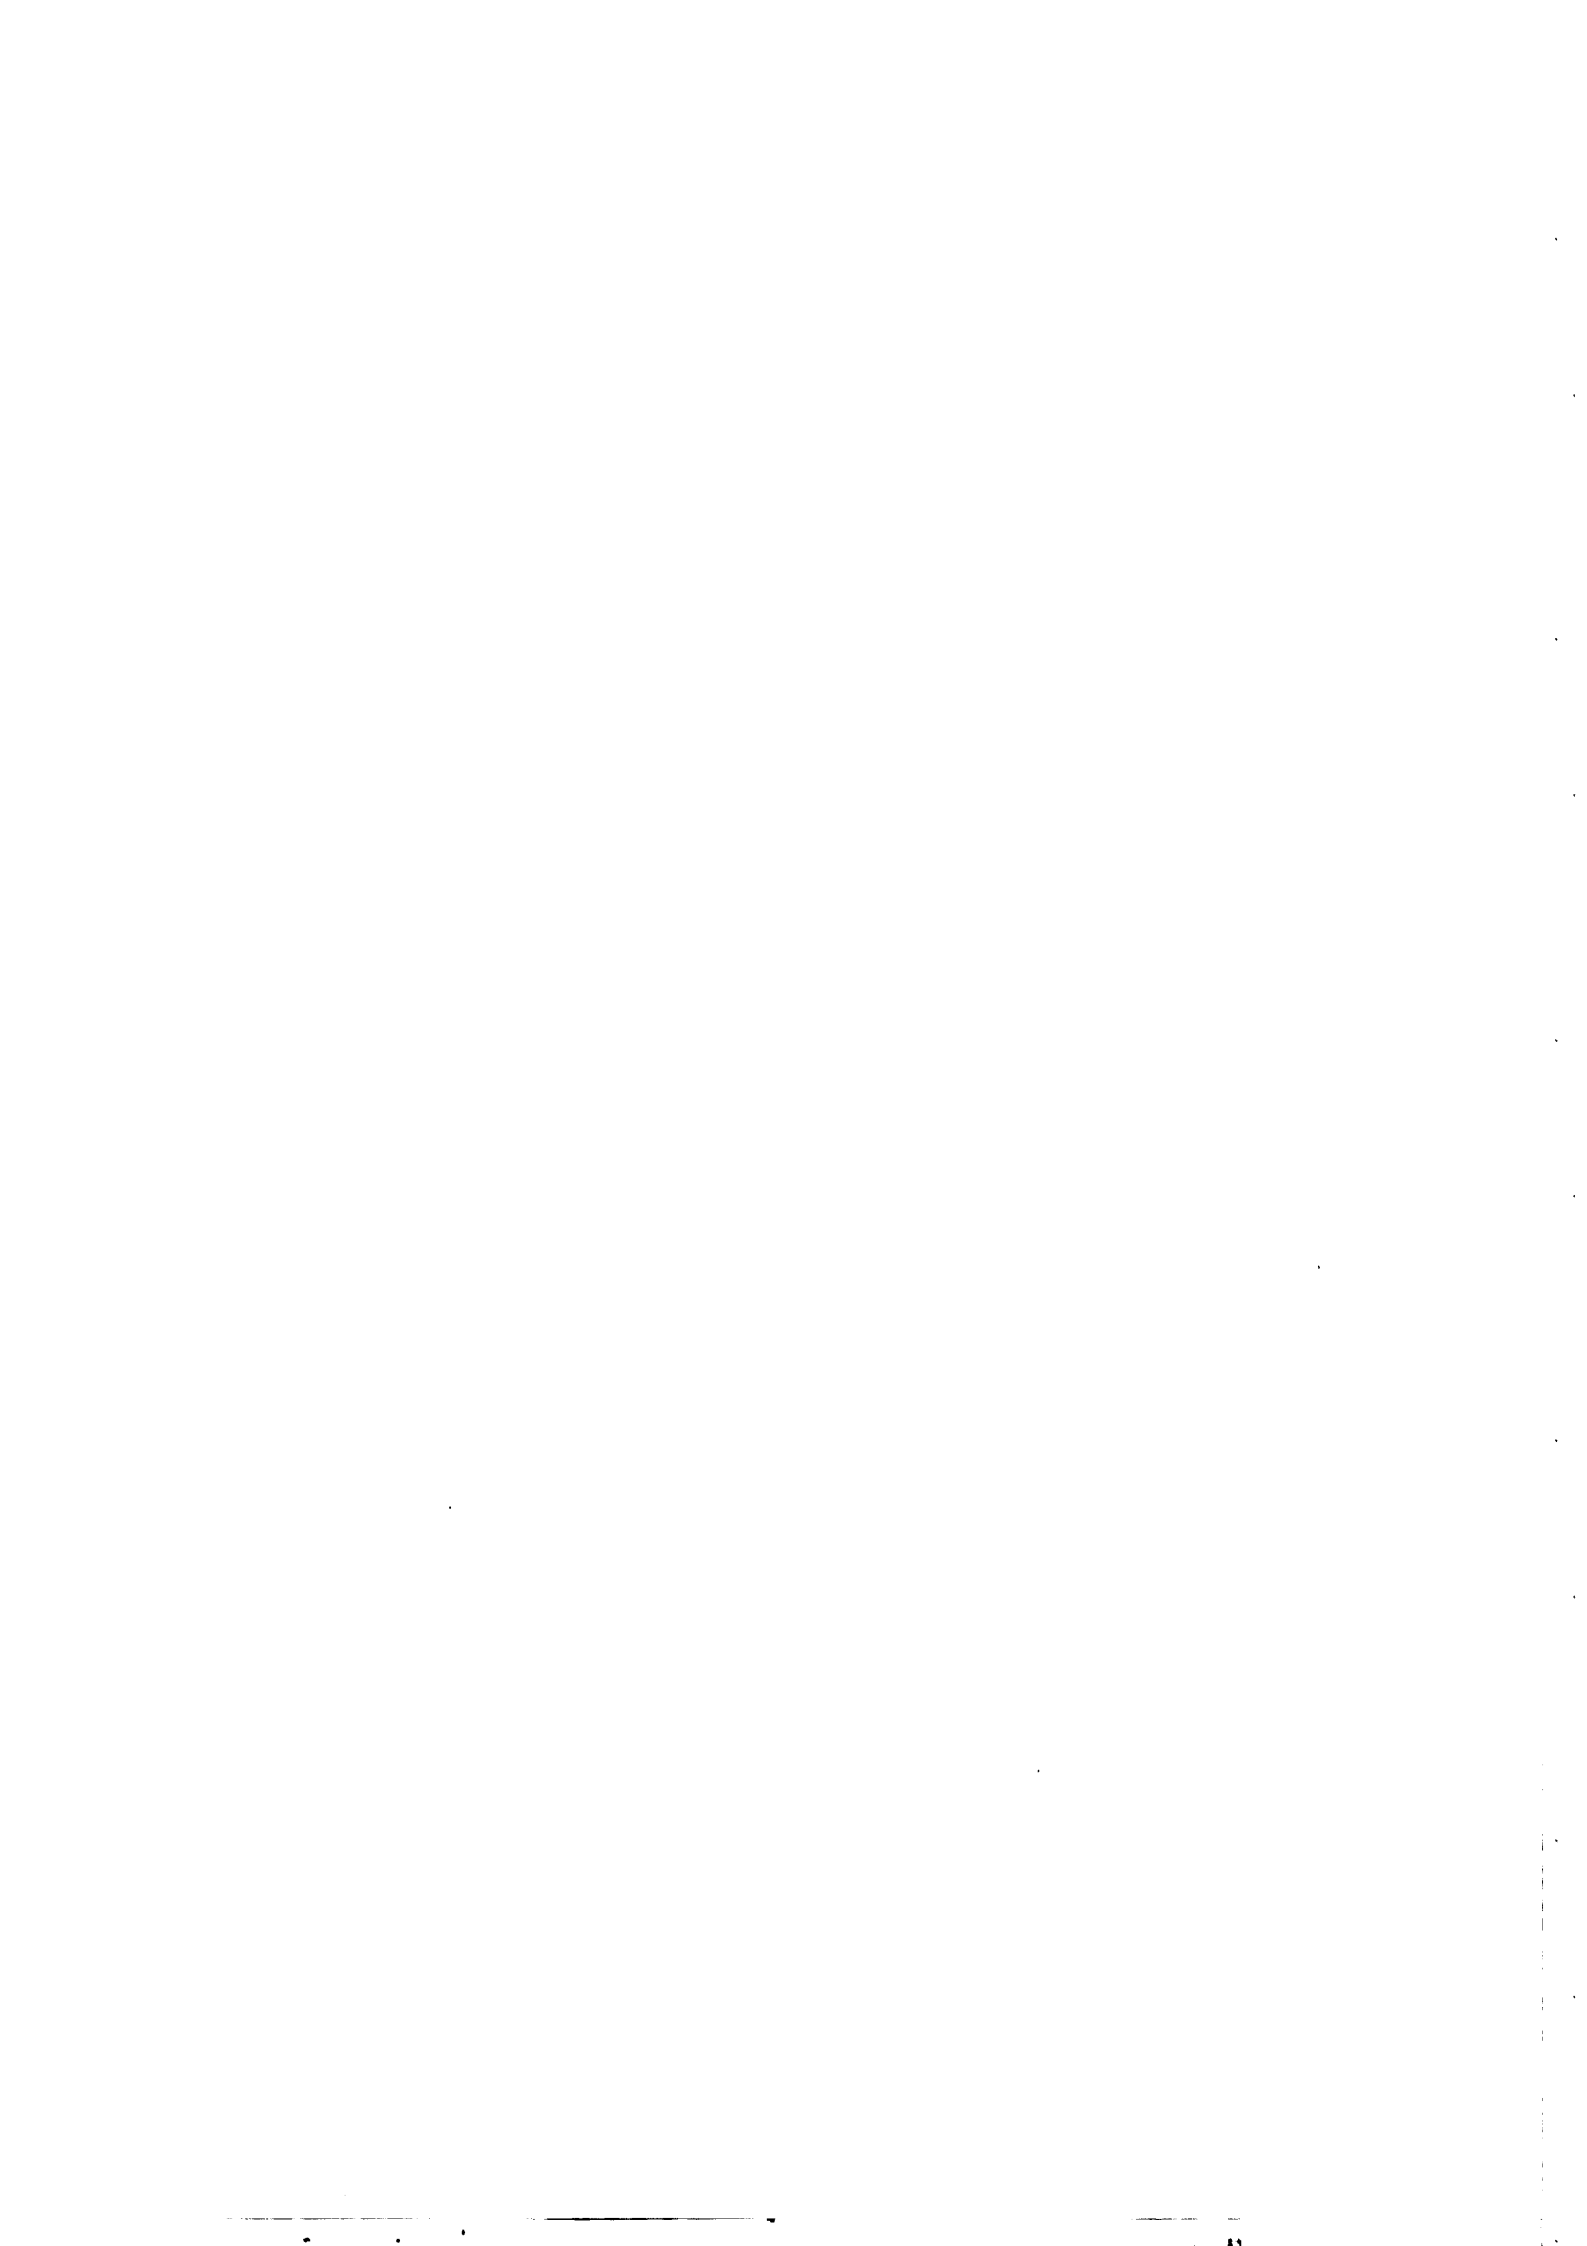

The 2000-01 Clean Water/Clean Air Bond Act Annual Report provides an update on the significant progress that has been made under the Bond Act since its inception. The report includes projects funded from five years of appropriations, 1996-97 through 2000-01. Volume 1 provides a summary of the Bond Act, presenting a description of the various programs funded from the Bond Act, a general overview of the fiscal status for each program and examples of projects. Volume 2 contains more specific fiscal information, listing individual projects, the amount of funding committed to each project and the total funds disbursed for each project through March 31, 2001.

Through March 31, 2001, a total of \$1.318 billion has been appropriated from the \$1.75 billion Bond Act. Of that amount, approximately \$1.119 billion has been committed to more than 1,600 specific Bond Act projects to protect the environment and public health. Hundreds of projects have been completed, are under construction or will begin construction this year. Each Bond Act project approved for funding from the five appropriation years is listed in this report.

In most cases, Bond Act funds are committed to projects after completion of a competitive application, technical review and public notification process. Following the completion of all required project selection processes, projects are awarded. Contracts for individual projects are then developed and approved between the State agency responsible for administering the program and the project recipient. Most of these contracts must be approved by the Department of Law and the Office of the State Comptroller.

Spending on capital projects typically takes several years, given the nature of the projects and the time needed to plan, design and construct a project. For the majority of State assistance programs, payments are made to municipalities or grant recipients after costs have been incurred and grant recipients have submitted requests for payment. This ensures the proper use of State funds. Total spending from the Clean Water/Clean Air Bond Act in its first four and one-half years total \$637 million and disbursements will continue to grow as more contracts are executed, and as projects move from project design to the construction phase of the project.

The appendices that follow present fiscal information specific to individual projects within the major funding categories of the Bond Act. Appendix A includes a general financial summary of the Bond Act, from its inception through March 31, 2001, the end of SFY 2000-01. Appendices B, C, D, E and F contain information on individual Bond Act projects and Appendix G contains information on Bond Act staff time and activity and related costs.

APPENDIX A - SUMMARY OF BOND ACT FISCAL INFORMATION

Appendix A summarizes the following information for the Bond Act's major categories and sub-categories: total appropriations; total commitments; total allocations; year-to-date disbursements; life-to-date disbursements; and the remaining uncommitted balances.

For purposes of this Report, these terms are defined as follows:

- Total Appropriations--depicts total amounts appropriated in the 1996-97, 1997-98, 1998-99, 1999-2000, and 2000-01 State Fiscal Year Budgets.
- Total Commitments--reflects the amount of funding which has been committed or approved for specific projects from all five years of appropriations.
- Total Allocated--represents the amount of funding authorized by the Division of the Budget to be spent on specific purposes or activities.
- Year-to-date Disbursements--reflects the actual cash payments made by the State Comptroller during State Fiscal Year 2000-01 (April 1, 2000 to March 31, 2001) to project recipients.
- Life-to-date Disbursements--reflects the total cash payments made by the State Comptroller to project recipients since the Bond Act was enacted. These amounts reflect total spending occurring in State Fiscal Years 1996-97, 1997-98, 1998-99, 1999-00 and 2000-01.

Appendix A shows that a total of \$1.318 billion in Bond Act funding was appropriated in State Fiscal Years 1996-97, 1997-98, 1998-99, 1999-00 and 2000-01. As of March 31, 2001, approximately \$1.119 billion has been committed to specific projects and more than \$637 million has been disbursed for these Bond Act projects.

Clean Water/ Clean Air Bond Act Annual Report on 1996-97, 1997-98, 1998-99, 1999-00 and 2000-01 Appropriations, as of March 31, 2001
APPENDIX B1 - SAFE DRINKING WATER LEVERAGED LOAN SCHEDULE
LIFE TO DATE

This chart lists all leveraged loans closed, as of March 31, 2001, by the Environmental Facilities Corporation (EFC) under the Drinking Water State Revolving Fund Program. Under this program, State funds from the Clean Water/Clean Air Bond Act are combined with federal funding, and leveraged by EFC, to finance loans for safe drinking water infrastructure projects.

Leveraged loans are financed from EFC bonds which are secured by borrower bonds. These loans are available to credit worthy communities, as determined by EFC. Bonds issued to finance the loans are further secured by federal and state match dollars ("Corpus Allocation") that are deposited to borrower reserve accounts. Loans financed from bond proceeds receive a corpus allocation equal to one-third of the loan amount. Investment earnings from the corpus allocation provide an interest subsidy to the borrower resulting in a below market interest rate loan.

Project Description	Loan Amount
ADAMS (V) - ADAMS VILLAGE	2,190,000

CLEAN WATER/ CLEAN AIR BOND ACT ANNUAL REPORT
APPENDIX B2 - SAFE DRINKING WATER DIRECT LOAN SCHEDULE
LIFE TO DATE, AS OF MARCH 31, 2001

This chart consists of the direct loans which have been closed by EFC as of March 31, 2001. These loans are also comprised of federal and state match dollars, however, direct loans are not leveraged with EFC bonds. Direct loans are available to communities with weak credit or whose loans are very small, based on a determination by EFC. Hardship loans have interest rates below general SRF loan rates and are made to communities whose drinking water projects would otherwise not be affordable.

CLEAN WATER/ CLEAN AIR BOND ACT ANNUAL REPORT
APPENDIX B3 - SAFE DRINKING WATER STATE ASSISTANCE PAYMENTS SCHEDULE
LIFE TO DATE, AS OF MARCH 31, 2001

This chart list communities which have received State Assistance Payments (grants) as of March 31, 2001. These projects are funded solely with Clean Water/Clean Air Bond Act funding. State Assistance Payments are available to public water systems where the project cost is less than \$10 million. The goal of this program is to provide communities, which otherwise could not afford essential projects, with the financial resources to undertake these important public health projects. Many projects receiving State Assistance payments also receive hardship loans for a portion of their projects.

CLEAN WATER/ CLEAN AIR BOND ACT ANNUAL REPORT
APPENDIX B4 - SAFE DRINKING WATER HARDSHIP STATUS PROJECTS LIFE TO DATE
LIFE TO DATE, AS OF MARCH 31, 2001

This list consists of those communities to which EFC has sent confirmation letters indicating the community's eligibility for a hardship loan and/or grant for specific drinking water infrastructure projects. However, communities must close on these loans/grants within two years of the date of their confirmation letter or be subject to approval in the next required Memorandum of Understanding with the Legislature.

Grants amounts include federal "CAP" grants, if applicable.

Clean Water / Clean Air Bond Act Annual Report

Appendix F4 - New York State Environmental Facilities Corporation

Clean Transportation - Other Air: Inspection and Maintenance

Air Quality - Individual Project Descriptions

Funding has been set aside from this appropriation to fund State Assistance Payments to eligible service stations in New York City, as well as to larger stations outside New York City, for the purchase of testing equipment required for the enhanced I&M program. This appendix lists projects that have received State Assistance Payments as of 03/31/01.

Most recipients receive a grant of \$5,000. As of 03/31/01, EFC has processed payments totaling \$6,118,000.

Clean Water / Clean Air Bond Act Annual Report

Appendix F6 - New York State Environmental Facilities Corporation

Small Business Compliance/ Financial Assistance to Business

Air Quality - Individual Project Descriptions - Inspection & Maintenance

Funding has been set aside from this appropriation to fund State Assistance Payments to eligible service stations outside of New York City for Inspection and Maintenance equipment required to conduct the enhanced inspection and maintenance program required by federal law in Long Island and Westchester and Rockland Counties. Appendix F-6 (see below) lists projects which have received State Assistance Payments.

Most recipients receive a grant of \$5,000. As of 03/31/01, EFC has processed payments totaling \$8,800,000.

Clean Water / Clean Air Bond Act Annual Report
Appendix F7 - New York State Environmental Facilities Corporation
Small Business Compliance/ Financial Assistance to Business
Air Quality - Individual Project Descriptions - Dry Cleaners

A total of \$6 million in funding has been set aside from this appropriation to fund State Assistance Payments to eligible dry cleaners for equipment to ensure compliance with State regulations. Appendix F-7 (see below) lists projects which have received State Assistance Payments. Additional payments to participating dry cleaners are being processed by EFC.

As of 03/31/01, EFC has processed payments totaling \$2,115,500.

Clean Water / Clean Air Bond Act Annual Report

Appendix F8 - New York State Environmental Facilities Corporation

Clean Transportation - Other Air: Heavy Duty Inspection and Maintenance

Air Quality - Individual Project Descriptions

A total of \$1,150,000 in funding has been set aside from this appropriation to fund State Assistance Payment to eligible service stations and other eligible participants toward the purchase of certified equipment to test emissions from heavy duty diesel vehicles.

As of 03/31/01, EFC has processed payments totaling \$275,000.
